## THE NEXT GENERATION OF IDENTITY FEDERATED ARCHITECTURES – ABSTRACT

*Fulup Ar Foll (Sun Microsystems)*

---

In his presentation Fulup Ar Fol will present the latest reflections and developments in the field of digital identity management which is:

- User Centric, nothing without my consent,
- Information collected, maintained once by the most appropriate source,
- Information verified to the adequate level,
- Information available electronically through a vendor neutral long-term standard,
- Information exchange securely to whomever requires it, in a privacy-aware manner,
- Significant benefit for people, businesses, government, enterprises.

**Keywords:** identity, user centric, federation of identity
