Abstract: This session will describe an interoperability use-case based on HR-XML and Europass CV. We will show how the ePet ePortfolio system from Newcastle University could benefit from HR-XML, Europass and the Europortfolio application profile specifications to publish a student CV from their system to the HR iProfile system from The SkillsMarket using the EifEL CV transformation webservice for cross-interoperability between them.

Keywords: eportfolio, hr-xml, europass, cv
