

# ePortfolio & CV interoperability

Exploiting personal data for employment

Paris 18-19 June 2007

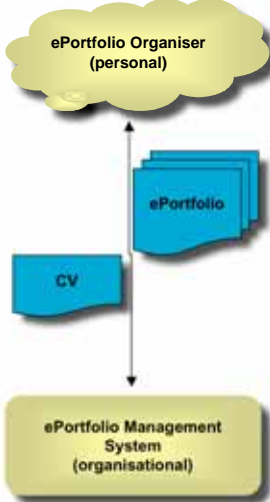

# The challenges

- ▶ How to exploit personal information for professional and personal development, employability and employment?
- ▶ How to manage (control) one's personal image on the Internet - digital identity, eSelf?
  - What commonalities and differences in the field of education, employment, health, administration and citizenship?
- ▶ How to maximise the benefits from emerging technologies and practice?
- ▶ What standards for what kind of interoperability?

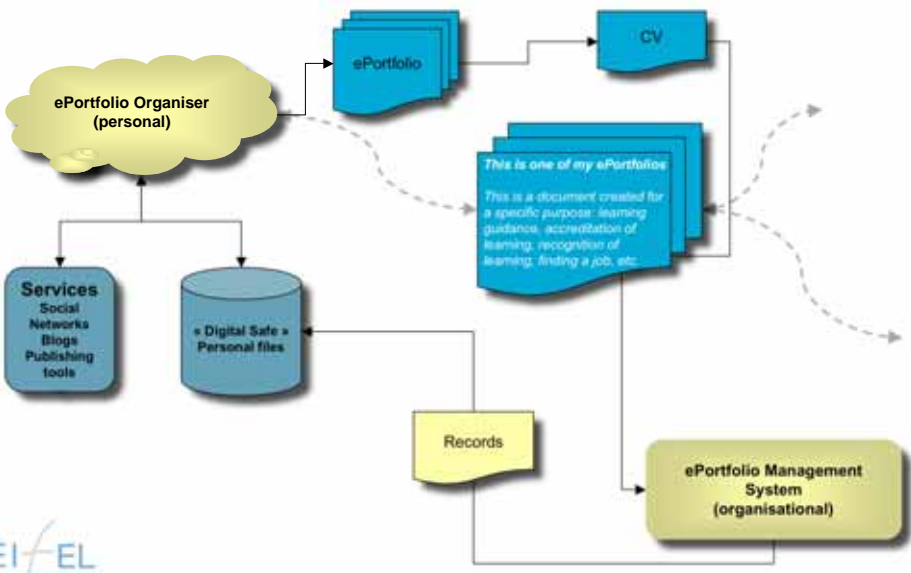

# The ePortfolio components

- ▶ **ePortfolio Organiser (personal)**
  - a system used by a person to collect, organise, aggregate, connect and publish authentic and diverse learning outcomes to support reflective learning and practice for personal and professional development.
  - A personal ID / knowledge / learning manager
- ▶ **ePortfolio (document)**
  - "a collection of authentic and diverse evidence, drawn from a larger archive, representing what a person or organization has learned over time, on which the person or organization has reflected, and designed for presentation to one or more audiences for a particular rhetorical purpose."
  - A CV can be seen as the front page of an ePortfolio
- ▶ **ePortfolio Management System (organisational)**
  - a system used to manage (produce, consume and exploit) elements of individual ePortfolios for a specific purpose - scaffolding learning, assessment, employment, competency management, organisational learning, knowledge management, etc.
  - Yellow pages, social networks and HR IS can be seen as ePMS
